Center

### Encryption:

- (Apple) FileVault
- (Windows) BitLocker

### Cloud Storage Solutions:

- Google Cloud Storage
- Amazon S3
- DigitalOcean Spaces

### File Storage:

- Google Drive
- Microsoft OneDrive
- Dropbox

In today's day and age, having a backup of your business's critical files is extremely important. In the event that something happens to your computers or your business, if you have a backup of your devices you can rest assured that you can continue business as usual no matter what challenges you may face. We highly recommend a secondary storage solution where you keep an exact copy of everything you need to run your business in the event of an emergency.

### File Backup:

- Google Drive
- SpiderOak One
- Rsync/rclone (Advanced, storage must be provided)

### Password Management:

- Lastpass
- 1Password
- Dashlane
- Keeper

### Business Wide Communication:

- Slack
- Skype
- Encrypted email solutions like Gmail or Microsoft Office
- Zoom

### Developing a Cybersecurity Readiness Plan:

- DSBDC cyber readiness tool by Anchor Security
- DSBDC cyber guides and tips by Anchor Security

### Business Platforms:

- Gsuite for business
- Office for business

### Digital Infrastructure:

- Google Cloud Platform (GCP)
- Amazon Web Services (AWS)
- Microsoft Azure
